Please use this form to request that a street tree be planted in the verge outside your residence. The particular tree species selected for your street will be determined by the "Street Tree Planning: Selections and Recommendations Guide". If your street is not included in the guide, then a suitable species of tree will be recommended that will complement existing trees in the street and one that is suitable for the location. Trees will be planted during the months of June, July and August for best results and dependant on availability.

Once the tree is planted, residents are encouraged to water the tree for the first two summers or until established.
